VENICE is world-famous for its canals it is built on an archipelago of 118 islands formed by about 150 canals in a shallow lagoon. The islands on which the city is built are connected by about 400 bridges. In the old centre, the canals serve the function of roads, and every form of transport is on water or on foot. Venice is universally considered to be the most beautiful city in the world because of this unusual urban design and its inestimable artistic heritage; it is included in the heritage of humanity projects protected by UNESCO and has the highest number of visitors of any Italian city, many of whom are foreign tourists.
